

Broker Solutions

Broker Solutions

Velocity Trade provides brokers and financial services providers with a 'plug-and-play' trading and investment platform designed to complement their service offering to private clients.

Whether managing clients' portfolios on a discretionary basis, providing advisory services, execution only services or offering their clients the ability to manage their own account, our partners are able to leverage the range of markets and functionality offered by Velocity as an extension of their own service and brand.

Desktop, web and **mobile interfaces** leverage off our back-office support and trading infrastructure providing access to global markets across multiple asset classes.

Our end-to-end solution is designed to enable financial services providers to manage a diverse range of services and client types in line with their licence status and offering. Our CRM and multi-asset trading platforms are supported by a feature-rich back office including consolidated reporting across asset classes and jurisdictions.

The many features and efficiencies of these solutions enable our clients to keep their operating costs low and focus their resources on their unique service offering. This enables our partners to provide their clients with a customised and self-branded website portal and trading platform, while leveraging off Velocity Trade's back-office support and trading infrastructure.

Velocity provides its clients with the **flexibility** and **functionality** required to support a large and diverse client base.

Velocity is uniquely positioned as a global institutional partner, providing its clients with a customisable trading and investment platform, competitive pricing and unique access to international, multi-asset products.

- Advanced front-end interface (Desktop, Web, Mobile)
- Global market access for trading and investing
- Multi-currency and multi-asset class
- Flexible execution and order routing
- Real-time risk management
- Charting, analysis and market data
- Direct Market Access
- Front and middle office functionality
- Client portal and reporting
- Broker portal and client administration

Velocity employs a “broker’s broker” approach, avoiding channel conflict with our clients, a model which facilitates a dedicated and aligned support service.

Leveraging Global Expertise and Superior Technology

Velocity Trade is a leading global broker-dealer combining **capital markets execution** with best of breed **technology** to deliver bespoke solutions to a global institutional client base.
